

Use of generative AI for documentation:

The use of generative AI for writing the documentation is restricted for reasons of research integrity, which also orients on guidelines of both research and industry. Generally speaking:

- The use of generative AI and AI-assisted technologies is allowed only for improving the readability and language of the documentation, including spelling or grammar checkers, as well as reference organisers (like Zotero, Mendeley, etc.). The authors are responsible to check any changes, which these kinds of AI-assisted tools provoke.
- Other use of generative AI in the writing process is PROHIBITED. This includes uploading to AI-tools, the rewriting of whole paragraphs by AI, the generation of AI-images, figures, artworks or other AI-created contents of the documentation.
- The authors need to declare, if and how generative AI and AI-assisted tools have been used during the writing process. The following declarations are based on a suggestion of [Elsevier](#).
 - Place a section between Conclusion and References named: *Declaration of generative AI and AI-assisted technologies in the writing process*
 - In case that any of such tools have been used, please fill out the following declaration and place into upper described section:
During the preparation of this work the author(s) used [NAME TOOL / SERVICE] in order to [REASON]. After using this tool/service, the author(s) reviewed and edited the content as needed and take(s) full responsibility for the content of the published article.
 - In case that no of such tools have been used, please place the following declaration into upper described section:
The author(s) declare that no AI tools or services have been used for creation of this work.
- In case that the authors have used generative AI and AI-assisted tools during the writing process without proper declaration, accusation of fraud are charged with severe consequences to follow.
